

BERICAP Technology

for E-Liquid Packaging

Know-how

As a supplier to the Beverage, Food & Non-Food Industries, BERICAP has a reputation for technical Know How and an indepth understanding of the caps and closure market build up over four decades. In 2015, BERICAP used its knowledge to create the e-smoCap™: a 3-piece Child Resistant Closure including an assembled dropper for the filling of e-cigarettes. The key of our success has been in-house R&D and in-house mouldmaking facilities. Furthermore, the BERICAP Technical Service Team supports the fillers in the process of setting up filling lines and afterwards during the daily production of e-liquids.

Global presence

BERICAP closures are manufactured according to international standards and BERICAP's global network guaranties product availability and technical support world wide.

Advantages of the e-smoCap™:
